Greater Glasgow and Clyde NHS Board
Food Fluid and Nutrition Planning and Implementation Group
Chaired by Rosslyn Crocket

Greater Glasgow and Clyde NHS Board
Infant Feeding Strategy Group
Chaired by Rosslyn Crocket. This Strategy Group directs and supports the work of the Infant Feeding Coordinator and the team and directs the sub groups of the strategy, overseeing overall progress and outcomes.

Greater Glasgow and Clyde NHS Board
Infant Feeding Strategy Implementation and Monitoring Group
This group sets the objectives of, monitors the progress of and directs evaluation of the strategy sub groups. Some of the sub group will be core and continuing and some will be short life working. There are representatives from across the Board acute services and CHCP’s, partner organisations, diversity, partnership, lay organisations and from each of the sub groups.

- **Infant Feeding Strategy Sub Group 1. – Clinical Practice**
  To ensure that best practice standards are embedded in training courses and local action plans.

- **Infant Feeding Strategy Sub Group 2. – Public Acceptability**
  To develop tools and training which support greater public acceptability of breastfeeding amongst organisations and the public.

- **Infant Feeding Strategy Sub Group 3. - Nutrition**
  To ensure the provision of formula milk and weaning information, development of standards of care and education for Health Professionals. To make links with other strategies, i.e. Oral Health, child health and obesity.

- **Infant Feeding Strategy Sub Group 4. Data Collection, Quality monitoring and communication**
  To ensure Basic standards for Data collection are available, achieved and information analysis informs local teams and strategy. To develop a process that ensures effective communication and handover of care amongst groups. To oversee the process of collecting information for and communicating out the Infant Feeding Strategy Annual Report.

The recommendation is that local groups are created within CHCP’s, maternity units, the RHSC and partner organisations
They should be chaired by local teams and the Terms of reference should be created locally,
- Local teams have responsibility and accountability for strategy objectives being met
- They have responsibility for action planning (Action Plans are within the Strategy document). These need to be carried out and individualised at a local level to meet local needs– The Board Infant Feeding Advisors will offer to support the local action planning process. They will help teams to implement tools which have been developed by the strategy sub groups and work with teams to implement standards and to increase local capacity and capability.
