NHS GREATER GLASGOW AND CLYDE

JOB DESCRIPTION

1. JOB IDENTIFICATION
   Job Title: Advanced Nurse Practitioner
   Responsible to: Lead Advanced Nurse Practitioner
   Department:
   Directorate:

2. JOB PURPOSE

Working across role and organisational boundaries the Advanced Nurse Practitioner (ANP) manages the complete clinical care for their patients utilising expert knowledge base and clinical competence to support multi-professional teams within NHS Greater Glasgow and Clyde, ensuring a high standard of clinical care, in accordance with the Nursing and Midwifery Council and Health and Safety Legislation.

As a clinical leader, the ANP has the freedom and authority to act autonomously in the assessment, diagnosis, treatment, including prescribing, of patients with multi-dimensional problems. This includes the authority to refer, admit and discharge within appropriate clinical areas.

ANPs can work in or across all clinical settings, dependant on their area of expertise.

3. ROLE OF DEPARTMENT

To assist in coordinating the provision of seamless care, in conjunction with medical staff and to liaise with other members of the Multi-disciplinary Team to facilitate investigation, treatment, transfer or discharge of the patient as efficiently and effectively as possible.

To provide a high quality, safe and supportive environment in order to care for patients within NHSGGC meeting the identified physical and psycho-social needs.

[Add detail relevant to specialty]
4. ORGANISATIONAL POSITION

ANPs are educated at Masters Level in advanced practice and are assessed as competent in this level of practice. As a clinical leader they have the freedom and authority to act and accept the responsibility and accountability for those actions. This level of practice is characterised by high level autonomous decision making, including assessment, diagnosis, treatment including prescribing, of patients with complex multi-dimensional problems. Decisions are made using high level expert, knowledge and skills. This includes the authority to refer, admit and discharge within appropriate clinical areas.

ANPs have developed a highly specialist knowledge across a range of work practices and procedures underpinned by theoretical and practical knowledge and experience.

The post-holder will be expected to work across role and geographical boundaries, providing complete clinical care for their patient as part of a multidisciplinary team. They will:

- Assess, diagnose and manage the clinical (medical and nursing) needs of a wide cohort of patients autonomously and with other members of the interdisciplinary team
- Responsible for ensuring the delivery of evidence based care.
- Provide clinical leadership and advice to nursing staff and other members of the multidisciplinary team.
- Work autonomously within a multidisciplinary team.
- Responsible for setting, implementation and evaluation of standards of nursing practice

5. SCOPE AND RANGE

Clinical

- Take and record a patient’s history including medical, family and social history, talking to the patient, relatives or other carers as appropriate. There may be significant barrier to understanding and acceptance due to sensitive or contentious information given and received.
- Conducts a comprehensive clinical examination of the patient including a physical examination of all systems and a mental health assessment
• Screen patients for disease using clinical and other findings such as laboratory results or x-rays

• Make diagnostic decisions based on interpretation of clinical and other findings such as laboratory results or x-rays

• Applies high level decision-making and assessment skills to formulate appropriate differential diagnoses based on synthesis of clinical findings.

• Has the authority to request, where indicated, appropriate diagnostic tests / investigations using judgement and clinical reasoning, based on differential diagnoses

• Conduct invasive and non-invasive diagnostic and therapeutic procedures where appropriate

• Interprets and analyses previously ordered results of tests/investigations and works collaboratively with other healthcare professionals when needed.

• Acts on the results to confirm diagnosis and thereby optimise treatment and management outcomes.

• Formulates an action plan for the treatment of the patient, synthesising clinical information based on the patient’s presentation, history, clinical assessment and findings from relevant investigations, using appropriate evidence based practice.

• Prescribe treatment including medications as a Non-medical Prescriber based on a sound knowledge of pharmacology

• Implements non-pharmacological related interventions/therapies, dependent on situation and technical requirements of care

• Has the freedom and authority to admit and discharge from identified clinical areas, dependent on patient need at time of review. This includes the freedom and authority to refer to all appropriate health care professional groups and agencies, working collaboratively with them.

Professional

• Innovate, develop and lead evidence based clinical practice and professional development

• Lead in the development of appropriate local policy and guidelines

• Contribute to the development of local policies in relation to the implementation of national and regional strategies

• Practice within the Legal & Ethical framework as established by Nursing Midwifery Council (NMC) and National Legislation to ensure patient interests and wellbeing are met.
• Work within the National Health Service (NHS), NHS Greater Glasgow & Clyde and Health & Safety Executive (HSE) Legislation, Policy, Guidelines and Procedures.

• Empower patients to take responsibility for their health, well-being and future lifestyle by practising in an open transparent and inclusive manner; thereby ensuring patients have the relevant information to participate in decisions about their care.

• Performance is monitored on an ongoing basis and is appraised annually.

Education and Research/Audit

• Maintain professional practice through continuing education, professional updating and when/where available, involvement with professional specialist groups.

• Participate in identifying needs of patients and carers in relation to the specialty, in conjunction with others where appropriate.

• Plans and organises teaching and mentoring of undergraduate nursing students, graduate nurse practitioner students, and other members of the healthcare team as appropriate (e.g. physiotherapy, radiology, FY2 medical staff).

• Actively promote and disseminate research-based practice.

• Audit current practice and negotiate appropriate changes to practice.

• Evaluate effectiveness of role in relation to patient outcomes, service needs and professional requirements.

• Participate in relevant research / audit projects to service and practice needs and in line with nursing research strategy.

• Ensure the provision of an appropriate learning environment in line with NES Quality Placement Standards.

• Provide guidance, supervision and support for staff undertaking research, audit or teaching activities.

Organisational/Managerial:

• Organise own time in line with agreed job plan.

• Accountable for the effective management of resources including stores supplies pharmacy and maintenance of equipment.

• Contribute to strategic issues relating to the nurse practitioner service and the specialty.
• Act in a collaborative and advisory role to share knowledge and expertise to help deliver high standards of patient care.

• Promote the development of a flexible and skilled nursing workforce.

• Contribute to the wider Corporate agenda where appropriate.
