Ask the patient if they have ever been told they are CPE positive. If the answer is no or don’t know, proceed with the CRA questions.

In the last 12 months has the patient:
- Been an inpatient in a hospital outside of Scotland? [ ] Yes [ ] No
- Received holiday dialysis outside of Scotland? [ ] Yes [ ] No
- Been a close contact of a person who has been colonised or infected with CPE? [ ] Yes [ ] No

If the answer to any of the above is yes, please isolate the patient in a single room and undertake the following screen:
- Rectal Swab (if patient refuses, a stool may be sent) [ ] Patient refused
- Stool specimen
- Urine (Only if urinary catheter/urine collection device in situ on admission)
- Wound swab (only if wound/break in skin present at time of admission)
