

ALCOHOL AND DRUGS PLANNING FRAMEWORK 2014-15 UPDATE

Relevant changes to the national and local context

- A need for services to respond to the recommendations set out by the Scottish Drug Strategy Delivery Commission's review of opiate replacement therapies (2013).

Areas which require additional or particular focus for year 2

- Review opiate replacement therapy pathways and services (including GP shared care) to ensure individuals receive effective care and support in the setting most appropriate to their needs.
- Develop NHSGGC 'core' alcohol and drugs service specifications and performance frameworks (with flexibility to suit local needs).
