

On the Move Programme

**GP Bulletin
22nd June 2015**

Outpatient Referrals

1. Outpatient Referral Arrangements

Following the migration of services into the new hospitals, **please note that you should continue to refer patients requiring an outpatient appointment, via SCI Gateway, to your normal place of referral e.g. New Victoria Hospital, Western Infirmary, Gartnavel General etc.**

Outpatient clinics will continue to operate as normal on these sites.

2. Transfer of Western Infirmary Services to the old RHSC

However, please note that a number of services which will serve the West Glasgow population will move to the old RHSC site in November this year. This will result in the full closure of the Western Infirmary. This is a temporary arrangement prior to transfer of these services to the Gartnavel General campus.

Work will commence shortly at RHSC to ensure the building can accommodate the range of adult outpatient and day treatment services moving to the site, which are as follows:

- General Outpatients
- Orthopaedic Outpatients
- Dermatology Outpatients and other treatments
- Diagnostics, including x-ray and laboratory services
- Cardiology
- Respiratory Physiology
- Minor Injuries
- West Maternity Care Centre

In addition, the Weight Management Service, currently at the Mansionhouse Unit, will also be re-located to the RHSC site.

Further information on the exact date of transfer will be provided in due course.
