

# Core brief

Friday, 09 September 2016

## Introduction

This issue provides information on potential service change engagement processes.

---

## Giving people a say

NHSGGC is encouraging patients, community representatives and campaigners to give their views on five potential service changes through a range of engagement processes launched this month.

These are separate to the arrangements that we expect staff to use and have their say, which will be communicated to you as we move engagement forward in September.
