

The Nursing and Midwifery Career-long ePortfolio allows practitioners to record evidence of continuing professional development on an electronic platform.

For Revalidation ePortfolio allows you to: -

- Access and record information on NMC approved documentation
- Request, collate and store feedback
- Store supplementary evidence in the personal library
- Store a scanned copy of your reflective discussion and confirmation forms*

** This is contrary to the guidance but has been approved by the NMC due to ePortfolio having robust governance structures in Scotland*
