Sandyford Services

Sandyford provides a quality-assured sexual health service across the whole of NHS Greater Glasgow and Clyde from our main base at [Sandyford Central](#), nine [community hubs](#) and also [satellite](#) locations. Sandyford services can provide you with all the information and help you need when it comes to sexual, reproductive and emotional health, including:

- Testing and treatment for HIV and Sexually Transmitted Infections
- Contraception including same-day Implanon, and copper and hormonal coil fitting
- Specialist consultant clinics for gynaecology and genitourinary medicine
- Specialist clinics for men who have sex with men, (the Steve Retson Project)
- Sexual problems service including erectile dysfunction and gender dysphoria clinics
- Specialised clinics for young people under 18 years called "[The Place](#)", although young people are also welcome at other clinics
- Counselling for men and women, including alcohol counselling for young people and post-termination counselling
- Hepatitis B vaccination
- Specialist sexual health information services at the Sandyford Library

All sites share the same electronic record system and protocols so you can make use of the service wherever you feel comfortable. All services are free, including your prescription if needed. You can find out further details of locations and opening times at [Where to find us](#)

Sandyford aims to offer you a full range of services when you attend. There may be instances where this may not be possible, for example if you attend with children. We do not have crèche facilities and staff members cannot be responsible for your child or children. If you require a procedure where children are present you may be asked to return on another day once you have made arrangements for them to be supervised.

Also there may be times when we have limited service due to staff shortages. This may mean that some services stop taking new clients earlier than the advertised finish times. People with emergencies will continue to be seen at the discretion of the nurse in charge. Please call ahead if you have any questions.

This short film gives you a short tour of Sandyford Central, explains which services are provided, and shows you what to expect when you visit.
