1.0 Introduction

Confidentiality is a fundamental principle in the delivery of health services. Much of the confidential information held relates to patients and employees of the service and this should be treated with respect to ensure its integrity, protection from inappropriate disclosure and it is readily available to authorised staff.

NHS Greater Glasgow and Clyde (NHSGGC) will take all reasonable measures to comply with its legal responsibilities and to preserve and maintain the confidentiality of the information it holds.

2.0 Scope

This policy applies to all staff employed by NHSGGC. It is also relevant to contractors, partnership organisations and visitors not employed by NHSGGC but engaged to work with, or who have access to health board information.

3.0 Policy Objectives

This policy aims to detail how NHSGGC meets its legal obligations and NHS requirements relating to confidentiality and information security standards. The requirements are primarily based upon the key piece of legislation, the General Data Protection Regulation, Regulation (EU) 2016/679,(GDPR) however other relevant legislation and guidance may be referenced, including other data protection laws.

NHSGGC fully endorse the six principles set out in the GDPR and all staff that process personal information must ensure these principles are followed. In summary these state that personal data shall be: -

- Processed lawfully, fairly and in a transparent manner ('lawfulness, fairness and transparency')
- Only processed for specified, explicit and legitimate purposes ('purpose limitation')
- Adequate, relevant and limited for the purpose ('data minimisation')
- Accurate and up to date ('accuracy')
- Kept in a way that permits identification and only for as long as necessary ('storage limitation'); and
- Processed in a way that ensures it is kept secure ('integrity and confidentiality')

The GDPR includes provisions that promote accountability and governance. NHSGGC has embedded policies and procedures to ensure all staff have the tools required to meet its legal obligations.

Furthermore, the Board is committed to adhering to the Caldicott principles for handling patient-identifiable data, namely: -

- Justify the purpose
- Only use when necessary
- Use the minimum required
- Access on a strict need to know basis
- Be aware of your responsibilities.
- Understand and comply with the law
- The duty to share information can be important as the duty to protect patient confidentiality

4.0 Roles and Responsibilities

4.1 Role of Chief Executive

The Chief Executive has overall responsibility for Data Protection. The Director of eHealth has delegated functional responsibility for Data Protection.

4.2 Role of Caldicott Guardian

The Caldicott Guardian is responsible and accountable for the Board's compliance with the Caldicott principles. This position is held by the Deputy Director of Public Health and supported by the Boards Medical Director and Senior Information Risk Officer.

4.3 Role of the Data Protection Officer

The Data Protection Officer (DPO) is a senior member of staff responsible for ensuring that NHS GGC Board and its staff are informed and given advice about how it can meet its obligations under the GDPR and other data protection laws. The DPO is responsible for monitoring compliance of the Regulation in how it relates to the personal information NHS GGC processes, including managing internal data protection activities, providing advice on data protection impact assessments; train staff and conduct internal audits. The DPO is the first point of contact for the Information Commissioners Office and for individuals whose personal information is processed (employees, patients etc). The appointment of a DPO is a mandatory requirement for NHS GGC under the General Data Protection Regulation, Regulation (EU) 2016/679 (GDPR).

4.4 Role of Directors and Heads of Departments

Senior managers are responsible for ensuring that the policy and its supporting standards and guidelines are built into local processes and that there is on-going compliance.

4.5 Role of Staff

Confidentiality is an obligation for all staff. Staff should note that they are bound by the NHSScotland Code of Practice: Protecting Patient Confidentiality. Staff have a confidentiality clause in their contract and are required to participate in induction and training to ensure they are kept updated on data protection and confidentiality issues.

5.0 Responsibilities

All employees working in NHS GGC are bound by a legal duty of confidence to protect and keep up to date personal information they may come into contact with during the course of their work. This is both a legal and contractual responsibility and also a requirement under the common law duty of confidence.

In order to ensure both new and current staff continue to receive appropriate training in data protection and confidentiality, NHS GGC will ensure there is a comprehensive training and awareness programme in place.

Person identifiable data is anything which contains the means either directly or indirectly to identify an individual, such as name, address, email address or CHI number.

Confidential information within the NHS is commonly thought of as health data and can include information that is private and not public knowledge or information that an individual would not expect to be shared. It can take many forms including patient level health information, employee records and occupational health records.

Information can relate to patients and staff, including temporary staff, however stored. Information may be held on many formats including paper, CD/DVD, USB sticks, computer file or printout and mobile devices.

5.1 Principles

With respect to person identifiable or confidential data, all staff must ensure that: -

- It is effectively protected against improper disclosure when it is received, stored, transmitted or disposed of
- Access is on a need-to-know basis
- Accurate and up to date information is maintained on staff and patients' records
- Disclosure is limited to that purpose for which it is required
- Any disclosure can be justified
- Concerns are reported promptly to Line Management or the Information Governance Department
- Unwanted or confidential data is disposed of correctly

5.2 Disclosures

To enable the sharing of personal and other important information between agencies, the Board has Information Sharing Protocols in place with Local Authorities and other agencies. These provide staff with detailed and specific guidance on the sharing of information between relevant parties.

To ensure information is shared appropriately with other parties, where an Information Sharing Protocol **is not required or appropriate**, care must be taken to ensure there is a legal basis for access to the information before releasing it.

5.2.1 Consider how much confidential information is required before disclosure and only disclose the minimum amount required.

5.2.2 Information can be disclosed:-

- When effectively anonymised
- When required by law or under a court order with appropriate authorisation as set out in the Data Protection Bill 2018
- Prevention and detection of serious crime with appropriate authorisation as set out in the Data Protection Bill 2018
- When in the public interest, such as concerns about a child or vulnerable adult
- With the explicit written consent of the individual;

This list is not exhaustive and further advice can be sought from the Information Governance Department.

5.2.3 Ensure the method of transferring the information is secure and seek advice from the IT Compliance Manager if required. Some data transfers may require a Data Sharing Agreement to be in place and advice can be sought from the Information Governance Department.

5.2.4 Ensure appropriate standards and safeguards are in place in respect of telephone enquiries, emails, faxes and postal mail.

5.3 Working Away from Base

Staff may be required to work from another location or from home and as such carry with them confidential information. Staff should be aware that:-

- The taking home / removing paper documents containing person identifiable data should be discouraged as far as is practical;
- Compliance with policies and procedures is still required;
- Confidential data should stay with staff member when being transported;
- Confidential data should be stored securely when at another location or at home when not being used;
- Personal identifiable or confidential data should not be forwarded to a private email account;
- Personal identifiable or confidential data should not be stored on a privately owned computer, device or mobile telephone.

5.4 Carelessness

Staff have a legal duty of confidence to keep person identifiable or confidential data private and not to divulge information accidentally and are reminded that they may be held personally liable for a breach of confidence.

You should also be aware that there are significant financial sanctions under GDPR for loss of personal data. This can be up to 20 million euros or 4% of gross annual turnover.

5.5 Abuse of Privilege

Staff **must not** knowingly browse, search for or look at any information relating to themselves, their own family, friends, colleagues or others without a legitimate purpose. This will be viewed as a breach of confidentiality and of the GDPR and will be dealt with in line with the Board's Disciplinary Policy and Procedure.

Regular audits of staff use of systems will be undertaken by the Information Governance Department.

6.0 Associated Legislation / Policies / Standards

- Access to Health Records Act 1990
- Computer Misuse Act 1990
- Copyright, Design and Patents Act 1988
- General Data Protection Regulation, Regulation (EU) 2016/679
- Freedom of Information (Scotland) Act 2002
- Human Rights Act 2000
- NHSIS IT Security Manual
- NHSScotland Caldicott Guardian's Principles into Practice 2010
- NHSScotland Code of Practice: Protecting Patient Confidentiality
- Privacy and Electronic Communication Regulations 2003
- Public Records Scotland Act 2011
- Regulation of Investigatory Powers Act 2000
- Scottish Government Records Management: NHS Code of Practice (Scotland)
- Telecommunications (Lawful Business Practice) (Interception of Communications) Regulations 2000
- Other relevant data protection laws.

7.0 Policy Review

This policy will be reviewed on every three years, unless the introduction of any new or amended relevant legislation warrants an earlier review.

8.0 Communication and Implementation

This Policy will be communicated through the Information Governance Framework.

9.0 Further Advice

For further advice on this Policy please contact the Information Governance Department.
