A family of integrated needle-based safety solutions that feature bold unobstructed graduations, bevel orientation, and a robust safety shield that provides reliable protection during and after disposal.

THE SAFETY YOU DESERVE
Protect your staff and patients against the threat of needlestick injury and reduce the spread of HIV and hepatitis when administering insulin and tuberculin to patients.

- Fully compliant with EU directive 2010/32/EU.

BOLD UNOBSTRUCTED GRADUATIONS
- Unobstructed, clear, bold graduations ensure clinicians have optimised visibility

COMPLETE NEEDLE COVERAGE
- The robust safety shield covers the entire needle

ONE HANDED SAFETY ACTIVATION
- Minimizes training and in-servicing

INTEGRAL SAFETY SHIELD
- Eliminates ability to remove safety device, increasing compliance
Instructions for use
Magellan™ Insulin and Tuberculin Safety Syringes

1. Magellan™ insulin and tuberculin safety syringes are available in several gauge and volume sizes.

2. Remove sterile softpack to allow syringe access.

3. Remove the protective needle sheath by gently pulling away from the needle.

4. Draw up your medication and administer to the patient as per your local facilities’ standard procedure.

5a. After drug delivery lock the safety shield by activating with your finger...

5b. ...or with your thumb. When the shield is in the locked position, you will hear an audible click and the safety shield will completely cover the needle and needle tip.

6. Once the shield is locked, dispose of the entire product in an approved sharps container.
