SOL-CARE™ Safety Hypodermic Needle

Needle protection device for injection

1. Peel blister pouch and remove device.
2. Attach the Sol-Care Safety Hypodermic Needle to the luer lock or luer slip syringe you require.
3. Pull back the safety sheath.
4. Remove the protective needle cover.
5. After use, engage the Sol-Care Safety Hypodermic Needle by gently pressing the coloured sheath against a suitable hard flat surface until you hear an audible click.
6. Audible and visual confirmation will indicate that the needle is captured inside the safety cover.
7. Dispose of the device into an appropriate sharps container.
