

Diabetes MCN Conference

Tuesday 5th February 2019

Beardmore Hotel and Conference Centre Clydebank

Outcomes of Priorities for Type 2 Workshop

- Discussion about quarterly data post QOF and variation across GGC in delivering 9 processes of care
- Request for more appropriate data taking into account frailty and demographics
- New Type 2 Management Guidelines
- Clearer links/paths of communication between primary and secondary care
- Role of lifestyle intervention and focus on early GWMS referral
- Goal at diagnosis should be remission of diabetes
- Clearer management pathways for subgroups e.g Obesity / CV disease / Elderly
- Intensification pathway and regular monitoring to avoid clinical inertia
- Case study examples and discussion
- GLP-initiation educational sessions in Primary care
