

Urgent care advice for patients and carers after having **Deep Brain Stimulation (DBS)**

National Scottish Deep Brain
Stimulation Service
Queen Elizabeth University
Hospital Glasgow

This leaflet gives you information and useful contact information if you need advice after having Deep Brain Stimulation (DBS)

Wound Issues

(e.g. potential infection or breakdown of skin)

Immediately after your surgery (e.g. up to 3 weeks afterwards)

If you think you have a wound infection or are worried about your wound please contact the Neurosurgical Wards at the Queen Elizabeth University Hospital where you had your surgery as soon as possible:

- Ward 65 – 0141 201 2017

Or your GP can contact the on-call neurosurgical registrar at the Queen Elizabeth University Hospital Glasgow.

3+ weeks after your surgery

Please contact your GP for an assessment; your GP can then contact your local Neurosurgical Team or the DBS team if necessary.

Any Mechanical or Electrical Issues with the Battery (Pulse Generator)

If you are having problems with the battery you may have to check the hand held programmer if you have one. (The programmer allows you to adjust the neurostimulator and to turn it on and off). If you are unsure how to do this you can phone us for advice or we can arrange for you to attend the clinic. (Please see the contact details below).

- Please check that the battery has not been accidentally turned off. This could lead to symptoms being uncontrolled. But you can easily switch it back on if you have a hand-held programmer.

- If the programmer shows the Elective Replacement Indicator (ERI) this means the battery is low and will need replaced over the next few months. This is not an emergency. Please contact the DBS Administrator.
- If the programmer shows End of Life (EOL) this means the battery needs replaced. If your symptoms or condition worsens please contact your GP for advice as we may need to replace this urgently. Otherwise, please contact the DBS administrator to arrange to have the battery replaced.
- For any other issues relating to the battery or the hand held programmer please contact the DBS administrator.

You can find further information in the DBS booklet, if you do not have a copy please contact the DBS administrator.

Contact Details

Margaret Reynolds
DBS Administrator

Telephone: **0141 232 7512**
(Monday to Friday 9.00am to 5.00pm)

Email: Margaret.Reynolds@ggc.scot.nhs.uk

Out of hours (after 5pm and before 9am and at weekends), if you think you require emergency advice which is not covered above, then your initial point of contact is your GP or NHS 24, who may contact the local neurology or neurosurgical team. They, in turn, can then contact the on-call neurosurgical team at the Queen Elizabeth University Hospital in Glasgow if this is necessary.
