

What is Moving Forward Together

- Moving Forward Together is a **Vision** to transform **healthcare** and **social care** services
- It describes **new ways of working** that provide safe, effective, person centred care to:
 - **Deliver improvements in care and outcomes for all patients service users and carers by:**
 - Maximising available resources
 - Making best use of innovation and technology
- The **Blueprint** for change was approved by NHSGGC Health Board and noted by the six Integration Joint Boards
- Sets a **strategic direction** of travel for the next **3 to 5 years** and beyond to meet future needs of the **whole population**
- It is aligned with **Scottish Government** strategy and plans

What this means

Our **current models** of care are facing a number of challenges

The current **'fix and treat' approach** to healthcare doesn't focus on prevention, self-management and reablement

Increasing reliance on hospital care is simply not in the best interests of people

The **increasing demand** will simply **not be met** unless we change how services are accessed and used

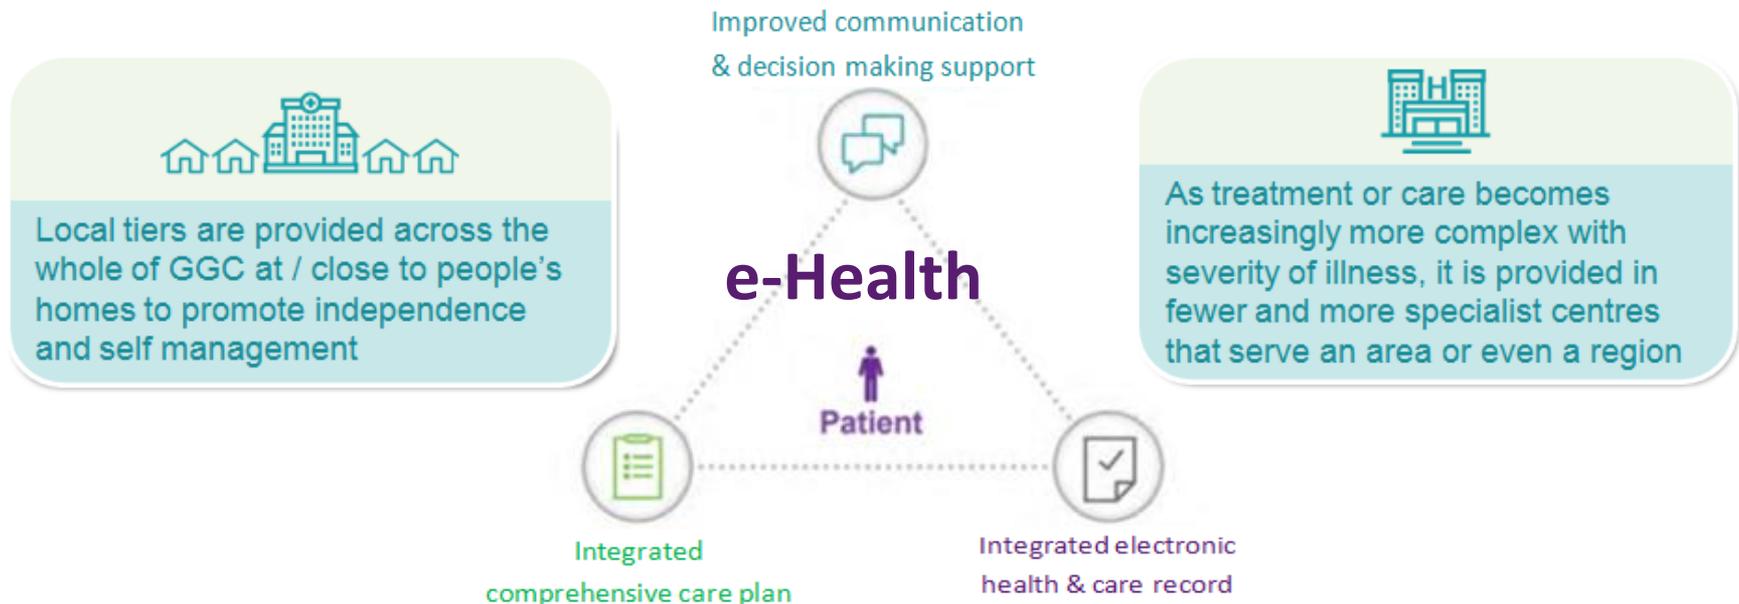

There is a **limited** budget to spend on health and social care, and we need to use our resources to provide services that are **realistic, affordable and sustainable**

What will it look like?

Tiered models of care working across the **whole system** to:

1. Maximise Primary, Community and Virtual Care Opportunities
2. Align with West of Scotland Regional Plans
3. Optimise our Hospital Based Services

We need to work with people on concepts to **hear what matters most to them** to develop more detailed plans

It's not just services that need to change...

- To help reduce pressure on the system people need to access the **right care**, in the **right place** at **right time**?
- To do this we need to:
 - Support people to access and use services differently
 - Improve knowledge of and trust in new models and alternatives
 - Promote greater self care and health improvement with the community networks to support this
 - Work collaboratively with the Third Sector, community planning partners and importantly people

**What does this mean for our services
delivering care for people with Diabetes?**
