Dräger X-plore® 8000
Powered Air-Purifying Respirator

Before use

1. Battery
   - To check the charging status of the battery, remove it from the device by pressing down the blue locking button.

2. Filter
   - Particle filter: Place the filter into the splash guard lid. Insert both at an angle into the unit. Fold it towards the device until the lid audibly clicks into place.
   - Gas / Combination filter I: Insert the filter (with the colour marking pointing downward towards the device) at an angle into the unit.
   - Gas / Combination filter II: Slip the splash guard lid over the filter. When correctly positioned, the lid snaps into place with an audible click.

3. Carrying system
   - Take the harness and button the comfort pad onto the strap if needed.
   - Position the connecting plate with the top edge at an angle onto the unit.
   - Push in the connecting plate until it audibly clicks into place on the device.
   - If necessary, a belt extension can be easily attached to your belt to make it longer.

4. Breathing hose
   - Hood: Plug the hose connector onto the coupling of the hood. Slightly turn the hose connector until it audibly clicks into place.
   - Helmet / Visor: Connect the hose connector with the coupling. Turn the hose connector clockwise to establish the connection.
   - Mask: Screw the standard thread connector onto the corresponding mask.

Always read and understand the instructions for use of the X-plore® 8000 powered air-purifying respirator prior to use!

## Use

### 5. Wearing the device
- Put on the carrying system and close the buckle. Tighten the straps.

### 6. Switching on the device
- Press the green button on the control panel. The device performs a self-test.
- The indicator lights up green if the device operates properly. If not, please refer to the IFU.
- The unit sets the lowest possible volume flow. Adjustment (+/-) is possible.

### 7.1 Use with hood (TH3)
- Adjust the head circumference and head height with the support ring.
- Open straps as far as possible.
- Direct the mask towards the face. First insert chin into the chin piece of the mask.
- Position face piece over the mouth and nose and pull the head cradle over the head.

### 7.2 Use with helmet/visor (TH2)
- Adjust the head circumference with the support ring. Attach the support ring to the buttons of the head harness so that it rests above the ears.
- Flip the visor up and put the helmet on. Use the loops on the face seal to pull the visor down so that the face seal firmly encloses the face.
- Fit harness over the head until the mask is in position.
- Position face piece over the mouth and nose and pull the head cradle over the head.

### 7.3 Use with full face mask (TM3)
- With the long hood, you can tuck the bottom layer of the bib into the protective clothing if desired.
- Make sure that the visor is completely closed. Use the hook-and-loop fasteners to adjust the face seal.
- Tighten straps until the mask fits snug and secure. First tighten both neck straps, then both temple straps and tighten front strap if necessary.

### 7.4 Use with half mask (TM2)
- With the support ring fastened it is possible to attach additional filters to the mask.
- Pull the straps uniformly until the half mask fits securely and comfortably against your face. If necessary readjust the straps.
